

ABS GmbH seeking Prototype Manufacturing Machinist

The ABS GmbH sees itself as a manufacturer and developer of customized high-tech digital camera systems based on DSPs and FPGAs. As an expanding high-tech company in terms of digital signal processing and electronic development we are looking for motivated employees working on pioneering projects from development to production. The ABS GmbH is an ambitious company with a promising future based on great innovation potential and high quality products which are sold to international clients all around the world.

The product range extends from the world's smallest mini-camera, video data loggers, intelligent cameras with real-time signal processing to high-sensitive cameras for the fields of Industry, Science, Biotech, Medicine, Logistics and various specialized applications.

Take advantage of the opportunity to participate in an established, global acting company and benefit from our long term experience in the field of electronics development to realize your potential with diligence, creativity and courage!

Thus, in Madeira (Funchal) and in Germany (Jena) we are looking for a

CNC Machinist (m/f/d) **CNC Mill/Turn Machine Operator (m/f/d)** **CNC Programmer (m/f/d)**

Your Assignment

- Study blueprints, sketches, drawings, manuals, specifications in order to realize prototypes
- Set-up, operate, edit and program CNC machines to produce serial products
- Experience in writing, storing, and modifying new and/or existing CNC programs
- Ability to write appropriate machine-level instructions, including revisions to existing programs

Your Profile

- Vocational training as a CNC-Machinist, -Programmer or comparable CNC-related qualification
- Extensive experience in programming, setting up and operating CNC machines
- Ability to read and understand engineering blueprints, drawings and data
- Quick learner, initiative, creativity
- Durable, flexible, team player
- Very good English, spoken and written
